2021 - CURR.

Vice President, Restore / PropTech, Verisk

I drive innovation and growth across a diverse portfolio of products (10), spanning API and enterprise solutions to consumer-facing apps. Under my leadership, subscription product revenue has grown by more than 60% annually, achieving record-breaking success by focusing on solutions customers love. We've pioneered industry-leading AI advancements, such as ROI calculations for remodeling costs with real estate data, and automated validation of tasks like yard maintenance and winterization through computer vision. We've launched new professional software features, such as automatic job scheduling based on construction phases and data, financial and data integrations, and enterprise-driven... 2019 - 2021

Vice President, Estimatics, Verisk

Leader of the company's largest division (117 people) and most valuable product suite. Spearheaded new online solutions, including the industry's most comprehensive administration tool. Led the launch of the company's first powerful rules engine, driving innovation and future growth. Played a pivotal role in achieving the company's highest financial performance in its 30+ year history. Drove advancements in technology and inventor on multiple patents. Achieved a 40% increase in active users for our mobile apps while also improving app ratings. Consistent performance enhancements raised our crash-free user rate from 93.2% to 95% in just one year. Operational improvements reduced total QA automation runtime... See more on LinkedIn.

2015 - 2019

Vice President, Mobile & Desktop, Verisk

Head of product development and operations for mobile and desktop solutions across iOS, Android, and Windows. Led a division of 70+ professionals, including engineers, QA, automation, UX, design, and project management. Championed the company's first machine learning and AI-driven features, driving innovation across key product areas. Spearheaded advancements such as voice estimation, Sketch interface improvements, video integration, and enhanced line-item attributes. Played a pivotal role in scaling the company to over $250M in annual revenue, driving international expansion with localized products in the UK, AU, FR, BE, DE, and CA.
